Profile Summary

Self-taught MERN stack developer with 1 years of hands-on experience in building full-stack applications using Node.js, Express.js, MongoDB, and JavaScript. Passionate about collaborating on web development projects and eager to contribute my skills to a dynamic team focused on growth and innovation.

Skills

Languages & Runtimes	: JavaScript, Node.js
Frameworks & Libraries	: Express.js, React.js
Front-End Development	: Bootstrap, Tailwind CSS, HTML, CSS
Databases & ORM	: MongoDB, PostgreSQL, Mongoose
Familiar With	: AWS, Nginx, Figma, Adobe Photoshop, Postman, MVC, Git, GitHub, Vite

Projects

Restaurant-Ecommerce Website (MVC NODE + View Engine)

- Developed a fully functional e-commerce web application using **Node.js** and **Express.js**, implementing core features such as **product management**, **cart operations**, **offers**, **coupons**, and **secure payments**.
- Followed the **MVC architecture** for structured server-side rendering using **Handlebars** and styled the UI with **CSS**.
- Built a dedicated **Admin Panel** for managing **products**, **orders**, **offers**, **user data**, and **sales analytics**.
- Integrated **Razorpay** for secure and reliable **payment processing**.
- Utilized **MongoDB** for efficient management of **user**, **product**, and **transaction data**.
- Deployed the application on **AWS EC2** for improved **scalability** and **high availability**.
